

The Metal Carboy Handle

Designed to make lifting and carrying carboys easier & safer.

Instructions

- 1 Remove or loosen the wingnut and then place clamp over the top of carboy neck and press down until it sits on the inner ring of the neck.
- 2 Reassemble clamp unit and handle through the screw and the washer and tighten the wingnuts.
- 3 Tighten the wingnut until feels tight enough (DO NOT OVERTIGHTEN).

Warning: Carboy handles are only meant to carry empty carboys. If you must move a full carboy with a Carboy Handle, support the underneath with your hand.
