

# There's No Second Guessing A One-Piece Testing Jar

- » No matter what kind of hydrometer you are using, one of our sizes will work.
- » They're more durable than glass, for a fraction of the price.
- » Our glue-free design ensures that you will never have to deal with messy leaks.
- » You don't want your jar to tip over. That's why we have a wide-based design.
- » These jars can hold their liquor! They can withstand high levels of distilled spirits, so they are practical for all of your batches.
- » If your hydrometer touches the walls of your jar, it will affect your readings. That's why this wide design is preferable.

## Once You've Tried Our Screw-Base Hydrometer Jar - There's No Turning Back

The cleaner the equipment - the better the product. That's why we've designed this revolutionary new screw-base testing jar. You can clean the base and tube separately, which is more effective for a thorough sterilization.

- » Simply screw-off the base for cleaning.
- » Staying consistent with the efficiency theme, this new design comes with a built-in spout for greater accuracy.
- » This jar can withstand high levels of alcohol. You'll never find a distilled spirit it can't handle.
- » Never lose a drop. This design has a wider base for greater stability.
- » There's nothing worse than receiving damaged goods. This design is ideal for shipping, since the base and tube can be taken apart.
